

FEED MANUFACTURING QUESTIONNAIRE

Insured Name:

Total annual sales of feed manufactured by you: \$

Total annual retail sales of feed manufactured by others: \$

Mill capacity: Tons Per Hour

PLEASE CHECK: Types Of Feed Manufactured:

Cattle	Swine	Pet Food	Other
Horse	Sheep	Ratite	

PLEASE CHECK: Safety measures applicable to your operation:

Dust Control Systems Ammeters on Legs Motion Sensors on Legs Internal Magnets on Mills
None

PLEASE CHECK: Safety devices supplied to employees:

Back Support Systems Safety Eyewear Safety gloves Non slip footwear None

PLEASE CHECK ONE: Extent of Safety Program and Policies:

No Safety Program

Informal Program - no written safety manual; safety meetings conducted regularly

Formal Program - written safety manual; safety meetings conducted regularly and documented

Advanced Formal Program - written safety manual; safety meetings conducted regularly and documented;
pre-employment screening post accident investigation; post accident drug test; random drug testing;
safety committee

PLEASE CHECK ONE: Extent of Housekeeping Program and Policies

No Housekeeping Program - cleanup on an "as needed" basis

Informal Program - no written housekeeping program; cleanup on a regular basis

Formal Program - written housekeeping program; cleanup on a regular basis

Advanced Formal Program - written housekeeping program; cleanup on a regular basis; scheduled shutdowns for
regular maintenance and housekeeping

FEED MANUFACTURING QUESTIONNAIRE

Do you sample incoming grains for aflatoxin?

YES NO

Do you retain samples?

YES NO

How long are samples retained?

1 Month 3 Months 6 Months 12 Months Longer

Do you adhere to the following guidelines in regards to aflatoxin?

YES NO

300 ppb for corn and peanut products intended for finishing (i.e., feedlot) beef cattle;
300 ppb for cottonseed meal intended for beef cattle, swine, or poultry (regardless of age or breeding status);
200 ppb for corn or peanut products intended for finishing swine of 100 pounds or greater;
100 ppb for corn and peanut products intended for breeding beef cattle, breeding swine, or mature poultry;
20 ppb for corn, peanut products, and other animal feeds and feed ingredients, but excluding cottonseed meal, intended for immature animals;
20 ppb for corn, peanut products, cottonseed meal, and other animal feeds and feed ingredients intended for dairy animals, for animal species or uses not specified above, or when the intended use is not known.

Do you retain samples of your finished feeds?

YES NO

How long are samples retained?

1 Month 3 Months 6 Months 12 Months Longer

Do you manufacture any feeds with Category I or Category II drugs?

YES NO

IF "YES", WHICH CATEGORY:

The two categories of drugs are known as "Category I" and "Category II."
Category I consists of those drugs for which no withdrawal period is required at the lowest continuous feeding level for any approved species. Category I drugs do not require an approved Medicated Feed Mill License for manufacturing of medicated feeds unless they are combined with a Category II drug source requiring a Medicated Feed Mill License.
Category II consists of drugs that either requires a withdrawal period at the lowest feeding level in at least one species for which the drug is approved, or is regulated on a "no-residue" basis because of a carcinogenic concern. Higher potency sources (Type A products) of Category II drugs require a Medicated Feed Mill License to manufacture medicated feeds. Lower potency sources (Type B products) are subject to the same requirements as Category I drugs.

Do you manufacture any feeds with Type A, B or C medicated product types?

YES NO

IF "YES", WHICH TYPE:

There are three (3) medicated product types: Type A, Type B, and Type C. These terms replace "medicated premix, concentrate, supplement, and complete feed," which are no longer being used in FDA's regulations. The Type A product is considered a drug, and the Type B and C products are medicated feeds.
A Type A medicated article is a product that consists of one or more new animal drugs intended for use in the manufacture of a medicated feed. It is the subject of an approved new animal drug application.
A Type B medicated feed is intended solely for the manufacture of other medicated feeds (Type B or Type C).
A Type C medicated feed is a complete feed for the animal, or is a feed that may be fed "top-dressed" or offered "free-choice" in conjunction with other animal feed.
